FOR RESEARCH USE ONLY

RESEARCH PEPTIDE CATALOG

2026 EDITION · UPDATED NOVEMBER

PRECISION • PURITY • PERFORMANCE

WWW.THEPATRIOTLAB.COM

ABOUT THE LAB

American-Owned. Research-Driven.

Patriot Labs supplies high-purity research compounds to laboratories, clinics, and qualified researchers across the United States. Every vial is produced to exacting standards and verified for identity and purity before it ships — because precision is not negotiable in research.

PRECISION

Accurately dosed, lot-tracked vials with batch documentation available on request.

PURITY

Third-party verified compounds, lyophilized and sealed for stability and integrity.

PERFORMANCE

Consistent, reproducible material researchers can build reliable data on.

American Owned & Operated
Proudly based and shipped from the USA.

Discreet, Fast Shipping
Plain, secure packaging on every order.

Quality Standards
Certificates of Analysis for current lots, published on product pages.

Researcher Support
Knowledgeable help with product selection.

01

Healing & Recovery

Compounds studied for tissue repair, soft-tissue recovery, and systemic healing pathways.

IN THIS SECTION · 4 COMPOUNDS

- BPC-157
- TB-500
- Wolverine Blend
- KPV

BPC-157

10MG PEPTIDE VIAL

A synthetic peptide fragment studied extensively in preclinical models for its role in tissue repair, angiogenesis, and gastrointestinal protection — a cornerstone compound in recovery-focused research.

$32

FOR LABORATORY RESEARCH USE ONLY

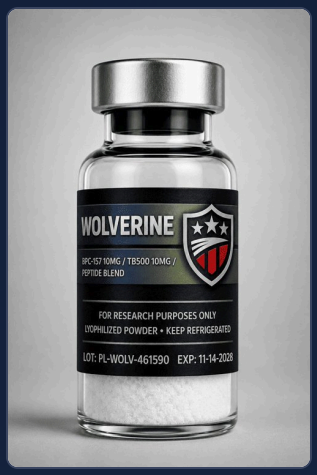

TB-500

10MG PEPTIDE VIAL

A synthetic form of the naturally occurring Thymosin Beta-4, investigated for its role in cell migration, actin regulation, and the repair of muscle, tendon, and connective tissue.

$56

FOR LABORATORY RESEARCH USE ONLY

Wolverine Blend

BPC-157 10MG / TB-500 10MG

A combined research formulation pairing BPC-157 with TB-500, studied together for potential synergistic effects on recovery and soft-tissue repair.

$67

FOR LABORATORY RESEARCH USE ONLY

KPV

10MG PEPTIDE VIAL

An α-MSH-derived tripeptide studied for its anti-inflammatory signaling, gut-barrier integrity, and tissue-recovery research applications.

$21

FOR LABORATORY RESEARCH USE ONLY

02

Growth Hormone & Performance

Secretagogues, releasing-hormone analogs, and binding proteins studied for their action on the growth hormone and reproductive axes.

IN THIS SECTION · 10 COMPOUNDS · 3 NEW

- CJC-1295 + DAC
- CJC-1295 (No DAC)
- CJC-1295 + Ipamorelin
- Ipamorelin
- Tesamorelin
- HCG
- Kisspeptin-10
- HMG
- Follistatin 344
- FLGR-242

CJC-1295 + DAC

5MG PEPTIDE VIAL

A long-acting growth-hormone-releasing hormone analog. The Drug Affinity Complex (DAC) extends half-life, making it a frequent subject of research into sustained GH and IGF-1 elevation.

$58

FOR LABORATORY RESEARCH USE ONLY

CJC-1295 (No DAC)

5MG PEPTIDE VIAL NEW

A short-acting GHRH analog, also known as Modified GRF 1-29. Without the albumin-binding DAC conjugate it is studied in pulsatile growth hormone signaling models.

$55

FOR LABORATORY RESEARCH USE ONLY

CJC-1295 + Ipamorelin

5MG / 5MG PEPTIDE VIAL

A research pairing of a GHRH analog with a selective GH secretagogue, studied for their complementary action on the pulsatile release of endogenous growth hormone.

$38

FOR LABORATORY RESEARCH USE ONLY

Ipamorelin

10MG PEPTIDE VIAL

A selective growth hormone secretagogue and ghrelin-receptor agonist valued in research for stimulating GH release with minimal impact on cortisol or prolactin.

$34

FOR LABORATORY RESEARCH USE ONLY

Tesamorelin

A stabilized GHRH analog investigated for its effects on visceral adipose tissue, lipid metabolism, and regulation of the growth hormone axis.

AVAILABLE STRENGTHS

2MG	**$22**
10MG	**$77**

FOR LABORATORY RESEARCH USE ONLY

HCG

10,000 IU VIAL

Human chorionic gonadotropin, a glycoprotein hormone widely studied for its role in signaling endogenous hormone production along the reproductive axis.

$56

FOR LABORATORY RESEARCH USE ONLY

Kisspeptin-10

5MG PEPTIDE VIAL

A decapeptide studied for its role in GnRH stimulation, signaling along the reproductive axis, and endocrine research applications.

$27

FOR LABORATORY RESEARCH USE ONLY

HMG

75 IU VIAL

A human menopausal gonadotropin preparation characterized by combined FSH and LH activity, studied in reproductive-endocrine and follicular-development research.

$39

FOR LABORATORY RESEARCH USE ONLY

Follistatin 344

1MG VIAL · NEW · SOLD OUT — RESTOCKING SOON

The full-length follistatin isoform — an activin- and myostatin-binding protein studied in TGF-β signaling and muscle-biology research models.

$88 ~~$146.67~~

FOR LABORATORY RESEARCH USE ONLY

FLGR-242

10MG PEPTIDE VIAL · NEW

A supplier-designated follistatin analog described by its manufacturer as an albumin-binding fusion construct. No peer-reviewed studies exist under this name; it is supplied for comparative research alongside follistatin.

$210 ~~$300~~

FOR LABORATORY RESEARCH USE ONLY

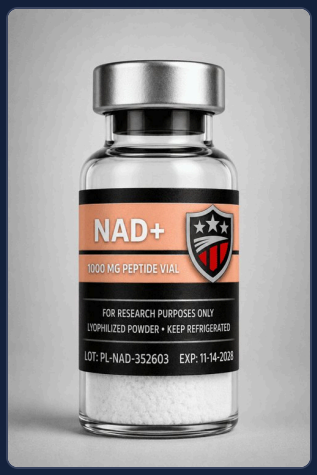

03

Longevity & Cellular Health

Research compounds targeting mitochondrial function, cellular senescence, and the biology of aging.

IN THIS SECTION · 4 COMPOUNDS · 2 NEW

- NAD+
- Epithalon
- FOXO4-DRI
- SS-31

NAD+

Nicotinamide adenine dinucleotide, a coenzyme central to cellular energy metabolism and DNA repair — a leading compound in research on mitochondrial function and cellular aging.

AVAILABLE STRENGTHS

500MG	$41
1000MG	$76

FOR LABORATORY RESEARCH USE ONLY

Epithalon

50MG PEPTIDE VIAL

A synthetic tetrapeptide (Epitalon) studied for its proposed influence on telomerase activity, circadian regulation, and the pineal peptide system.

$58

FOR LABORATORY RESEARCH USE ONLY

FOXO4-DRI

NEW 10MG

A modified peptide designed to disrupt the FOXO4-p53 interaction, investigated in senolytic research for the selective clearance of senescent cells.

AVAILABLE STRENGTHS

2MG	$135	
10MG	$380	~~$475~~

FOR LABORATORY RESEARCH USE ONLY

SS-31

NEW 50MG

Also known as Elamipretide, a mitochondria-targeted peptide studied for its role in stabilizing cardiolipin and preserving mitochondrial bioenergetics.

AVAILABLE STRENGTHS

10MG	$31	
50MG	$124	~~$155~~

FOR LABORATORY RESEARCH USE ONLY

04

Cognitive & Nootropic

Neuropeptides studied for effects on cognition, neuroprotection, mood, and sleep architecture.

IN THIS SECTION · 4 COMPOUNDS

- Semax
- Selank
- DSIP
- Pinealon

Semax

10MG PEPTIDE VIAL

A synthetic ACTH-derived peptide studied for its proposed effects on BDNF expression, neuroprotection, and cognitive performance.

$34

FOR LABORATORY RESEARCH USE ONLY

Selank

10MG PEPTIDE VIAL

A synthetic analog of the immunomodulatory peptide tuftsin, investigated for anxiolytic, nootropic, and neuro-immune research applications.

$34

FOR LABORATORY RESEARCH USE ONLY

DSIP

15MG PEPTIDE VIAL

Delta Sleep-Inducing Peptide, a naturally occurring neuropeptide studied for its role in sleep architecture, stress modulation, and neuroendocrine regulation.

$48

FOR LABORATORY RESEARCH USE ONLY

Pinealon

10MG PEPTIDE VIAL

A short neuropeptide investigated for its proposed role in neuronal signaling, neuroprotection, and cognitive-aging research.

$32

FOR LABORATORY RESEARCH USE ONLY

05

Metabolic Research

Mitochondrial-derived peptides and small molecules studied for metabolism and energy regulation.

IN THIS SECTION · 4 COMPOUNDS

- 5-Amino-1MQ
- MOTS-c
- AOD-9604
- Cagrilintide

5-Amino-1MQ

50MG VIAL

A small-molecule NNMT inhibitor studied for its potential influence on cellular NAD+ salvage, adipocyte metabolism, and energy expenditure.

$75

FOR LABORATORY RESEARCH USE ONLY

MOTS-c

A mitochondrial-derived peptide investigated for its role in metabolic regulation, insulin sensitivity, and exercise-mimetic signaling.

AVAILABLE STRENGTHS

10MG	**$23**
40MG	**$82**

FOR LABORATORY RESEARCH USE ONLY

AOD-9604

5MG PEPTIDE VIAL

A modified fragment of human growth hormone (176-191) studied for its role in lipolysis and fat-metabolism research.

$37

FOR LABORATORY RESEARCH USE ONLY

Cagrilintide

5MG PEPTIDE VIAL

A long-acting amylin analog studied for its role in appetite-signaling and body-weight research models, often investigated alongside GLP-1 agonists.

$48

FOR LABORATORY RESEARCH USE ONLY

06

Advanced Research

Next-generation multi-receptor agonists and exercise-mimetic compounds at the frontier of metabolic research.

IN THIS SECTION · 3 COMPOUNDS · 1 NEW

- **Retatrutide**
- **Tirzepatide**
- **SLU-PP-332**

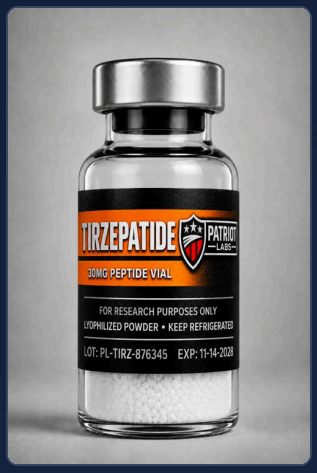

Retatrutide

A next-generation triple agonist (GIP / GLP-1 / glucagon receptors) at the forefront of metabolic research into incretin and glucagon signaling.

AVAILABLE STRENGTHS

10MG	$70
20MG	$125
30MG	$175 ~~$218.75~~
60MG	$310

FOR LABORATORY RESEARCH USE ONLY

Tirzepatide

30MG PEPTIDE VIAL NEW

A dual GIP / GLP-1 receptor agonist built on a GIP backbone with a fatty-diacid side chain, studied for incretin-receptor signaling and metabolic research.

$88 ~~$146.67~~

FOR LABORATORY RESEARCH USE ONLY

SLU-PP-332

5MG VIAL

A small-molecule estrogen-related receptor (ERR) agonist studied as an exercise mimetic in models of metabolic rate and fat oxidation.

$52

FOR LABORATORY RESEARCH USE ONLY

07

Cosmetic & Specialty

Peptides and complexes studied for skin remodeling, collagen synthesis, and specialty applications.

IN THIS SECTION · 9 COMPOUNDS

GHK-Cu	AHK-Cu	Glow Blend
KLOW Blend	Glutathione	PT-141
Melanotan II	B12	Botulinum Toxin

GHK-Cu

100MG PEPTIDE VIAL

Copper tripeptide-1, a naturally occurring complex studied for its role in skin remodeling, collagen synthesis, and wound-healing research.

$25

FOR LABORATORY RESEARCH USE ONLY

AHK-Cu

100MG PEPTIDE VIAL

A distinct copper-binding tripeptide studied in human hair-follicle explants and cultured dermal-papilla cells; published evidence remains primarily preclinical.

$44

FOR LABORATORY RESEARCH USE ONLY

Glow Blend

BPC-157 10MG / TB-500 10MG / GHK-CU 50MG

A multi-peptide cosmetic research blend formulated for synergistic study of skin quality, tissue repair, and recovery pathways.

$100 ~~$125~~

FOR LABORATORY RESEARCH USE ONLY

KLOW Blend

KPV 10MG / BPC-157 10MG / TB-500 10MG / GHK-CU 50MG

An advanced multi-peptide research blend studied for combined repair, anti-inflammatory, and cosmetic research applications.

$112 ~~$140~~

FOR LABORATORY RESEARCH USE ONLY

Glutathione

1500MG VIAL

The body's principal endogenous antioxidant tripeptide, studied for its role in cellular detoxification, redox balance, and oxidative-stress research.

$38

FOR LABORATORY RESEARCH USE ONLY

PT-141

10MG PEPTIDE VIAL

Bremelanotide, a melanocortin-receptor agonist studied for its central role in arousal pathways and neuro-behavioral research.

$25

FOR LABORATORY RESEARCH USE ONLY

Melanotan II

10MG PEPTIDE VIAL

A synthetic melanocortin analog studied for its activity on pigmentation pathways and melanocortin receptors in research models.

$22

FOR LABORATORY RESEARCH USE ONLY

B12

10,000MCG / 10ML VIAL

A vitamin B12 (cyanocobalamin) research solution studied for its role as an enzyme cofactor in methylation and cellular energy-metabolism pathways.

$30

FOR LABORATORY RESEARCH USE ONLY

Botulinum Toxin

100 IU VIAL SOLD OUT — RESTOCKING SOON

Botulinum toxin type A, a purified neurotoxin studied for its action on neuromuscular signaling across dermatological and muscle research models.

$44

FOR LABORATORY RESEARCH USE ONLY

FEATURED BUNDLE

★ BEST VALUE · 11 PIECES · READY TO SHIP

ULTIMATE STARTER KIT

Everything on the research-supplies shelf in one box — prep, storage, handling, and disposal, covered.

WHAT'S IN THE BOX

01 — **Peptide Pen Injector**
With branded hard case

02 — **Peptide Storage Cooler**
Holds 8–15 vials

03 — **Peptide Vial Roller**
Fits 3–30mL vials

04 — **Supply Organizer**
3 compartments

05 — **Reconstitution Helper**
Holds 6 vials

06 — **Sharps Container**
1 quart

07 — **3mL Pen Cartridges**
10 pack

08 — **Peptide Pen Tips**
31G × 8mm · 100 ct

09 — **Alcohol Prep Pads**
200 count

10 — **Bacteriostatic Water**
3mL · USP

11 — **Premium Sticker**
Embossed die-cut

ORDERING & SHIPPING

How to Order

Browse the full catalog and place orders directly at **www.thepatriotlab.com**. All products ship lyophilized and sealed, with discreet, secure packaging on every order.

$20
FLAT-RATE SHIPPING
Fast, tracked & discreet

FREE
SHIPPING OVER $200
Applied automatically at checkout

USA
SHIPPED DOMESTICALLY
American owned & operated

SAVE MORE

Buy 3 or more of any item and save 10%. Orders of $1,000+ receive 20% off. Sale prices shown in this catalog are current as of November 2026 and may change — the website always shows live pricing.

STORAGE & HANDLING

Store lyophilized vials cool and dark. Reconstitute with bacteriostatic water and keep refrigerated after reconstitution. Lot numbers and expiration dates are printed on every label; Certificates of Analysis for current lots are published on product pages.
